Report:

From crawling through content of 55,393 JSON files located in the DEV folder, our results showed 545,556 tokens. This was gathered from parsing HTML script, header, and bold tags. Our definition of a token is any alphanumeric word with more than 2 characters. At the end, the total size of our index on disk was 6,603 KB. Below is a sample of the tokens we collected. We could not include all of the tokens because this PDF file would have been too large to open.

End Result:

Number of documents: Parsed through content of 55,393 JSON files, the number of documents for each token was recorded in our index. A sample of the index is pasted below.
Number of [unique] tokens: 545,556 unique tokens
Total size (in KB) of your index on disk: 6,603 KB
